
JetCity

Offering an impeccably maintained Citation X and other jets to corporate clients

For over 20 years, JetCity has been at the forefront of servicing the needs of private jet users in Australia.

As a company founded and staffed by corporate pilots, we understand the sophisticated requirements of the modern business executive.

Our main base is at Melbourne International Airport providing domestic and international jet charter. Our jet fleet comprises a 9/10 seat Citation X and three Learjet 35's. In addition to these aircraft we also manage other jet types for our existing clients.

We have an impeccable safety record both on the ground and in the air. Our operation is regularly audited ensuring we meet the highest industry standards. We employ experienced full time licensed aircraft engineers at our Essendon Base servicing our own, as well as third party aircraft.

We run a very smooth operation, ensuring that all your requirements, including ground travel and accommodation are coordinated seamlessly.

We also provide a 24/7 Fixed Base Operation (FBO) at Melbourne to ensure that your flight is a totally relaxing experience. When you arrive at our private premises, there is no queuing for check-in, or immigration, no waiting for delayed aircraft.

Our driving motivation is to provide attentive service at all times. We will go the extra mile to ensure your total satisfaction, no matter how big or small. It goes without saying that the comfort and amenity in our jets and facilities are of the highest order. We operate a highly responsive customer service model - we never close and are always contactable in person.

JetCity welcomes your enquiries about our private jet charter, FBO services, aircraft management and maintenance services. Contact us anytime of the day or night, we never close!
